

THE ACTROS.

This one gets things shifted. Be it as a car transporter or with a silo or tank superstructure, the Actros is the right choice for heavy-load distribution jobs.

Mercedes-Benz
Trucks you can trust

THE ACTROS.

Functional, efficient, reliable: with the Actros, you're making the right choice when it comes to heavy-duty short-radius distribution. Here, you have modern driver assistance systems and safety systems at your side. The compact, lightweight cab allows for greater payloads and is bodybuilder-friendly.

Economical driving

With economical engines combined with PowerShift Advanced, the Actros boasts a highly efficient powertrain. Predictive Powertrain Control not only makes driving uphill, downhill and on straight stretches even more efficient – on winding roads and at roundabouts too, it regulates the powertrain with foresight thanks to precise 3D maps, contributing to fuel savings of up to 5%.¹ The smart MirrorCam results in improved aerodynamics and cuts fuel consumption by up to 1.3%.

Function meets comfort and convenience

A mere three steps separate you from the cab: climb in, take a seat and off you go. Multimedia Cockpit Interactive 22² displays all the relevant functions clearly on a large screen – from the satnav to traffic sign assist. The 12.3-inch instruments panel and the 10.2-inch Multi-Touch-Display can be easily controlled via the multifunction steering wheel, for greater work and operating convenience. The climate-controlled seats offer extra comfort as well. High-quality interior design makes your time in the cab as pleasant as possible, be it while working or during breaks. The Mercedes-Benz Trucks navigation system offers dynamic routing and gets you to your destination via the quickest route thanks to real-time traffic data.

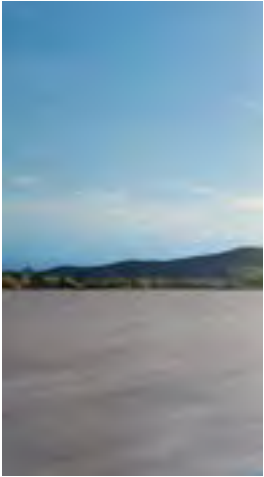

¹ In comparison to models without Predictive Powertrain Control.

² Available from 06/25.

THE ACTROS.

Expertise in your requirements

The Actros is precisely equipped for the required use, be it as a car transporter, a silo truck or a tanker. With a choice of bodies and cabs, a variety of transportation solutions are possible, allowing you to meet demanding requirements in the area of heavy-duty short-radius distribution too.

Service included

We help you keep your Actros where it earns money – on the road – with tailored service contracts, a network of authorised repairers and Mercedes-Benz Trucks Service 24h, which is available around the clock. Our optional Mercedes-Benz Trucks Complete service package includes maintenance, checks, repairs, the replacement of wear parts and much more besides – throughout the truck's life cycle. In the area of vehicle management, you are assisted by add-on digital services such as Mercedes-Benz Trucks Uptime, Fleetboard, TruckLive and the My TruckPoint for Mercedes-Benz Trucks customer portal. Daimler Truck Financial Services offers bespoke financial services for both vehicle usage and vehicle ownership.

Attentive on-board aids

Get safely under way – with the innovative assistance systems³ from Mercedes-Benz Trucks in the Actros for distribution. The holistic safety concept not only conforms to all statutory regulations and standards but also goes beyond these with several of its functions. The latest version of Active Brake Assist can recognise hazards and critical situations better than ever before and react with clear warning signals or even initiate an automatic emergency stop. Active Sideguard Assist 2 is also there for drivers when it comes to turning off to the left. In critical situations, it can intervene by braking the vehicle. Further safety assistance systems such as Active Drive Assist 3 and the new Front Guard Assist make driving even safer, allowing you to better keep track of everything on the road and let you travel in even greater comfort.

³Assistance systems can only support drivers. The driver is always fully responsible for driving the vehicle safely.
